REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant's invention relates to a system for product selection at a location comprising: a wearable mobile computer with memory and a processor, a bar code reader in communication with the wearable mobile computer, a viewing and input component, an audio output device, and an audio input device in communication with the wearable mobile computer, text-to-speech software, voice recognition software, applications software residing in the memory; a printer and a radio frequency identification (RFID) reader in communication with the wearable mobile computer, and wherein the wearable mobile computer is further adapted for direct communication with a user and an order system server.

The closest prior art relevant to the claimed invention cited by the Examiner is Swartz et al. (U.S. Patent Publication Number 20030020629 A1).

Swartz et al. discloses a portable data system capable of being worn by a user whereby the data system includes a wireless transceiver for use in a communication system having a base/data transfer station for receiving data from a plurality of said portable data systems whereby the information is then further transferred to a central processing unit or host computer. See following figure:

FIG. 7

In addition, Bunte et al. further details that a memory may also function as a ROM storage for the voice communications system operating code, which is interpreted by the Examiner as software repository, capable of storing the software needed to provide the function of communicating text to speech and receiving communications from the user using the said customizable voice communication system of the said portable data terminal.

Although Swartz et al. and Bunte et al. is considered to constitute to the state of the claimed invention; however, in contrast with comparable differences, the instant Application is considered novel over the prior art because the instant application claims a direct communication with an order system server, whereby a relay/intermediary device is not necessary for communicating information to the said server. In addition, the Applicant claims whereby order filling software resides on the wearable computer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
